

SMALL FORM RIBBON FIBER SERIES SPLICE SLEEVE

Splice Technologies' "SMALL FORM RIBBON FIBER" Series fusion splice protection sleeve is specifically designed for applications where a small size fiber ribbon splice sleeve is required for high density applications. The after shrink dimensions are only **5.0mm X 2.6mm** and will accommodate **2 - 12** fiber ribbon. It is available in **24, 30 & 40mm** lengths and designed to work with all ribbon fusion splicers. This product may be installed in most *single* fiber splice sleeve holders like our **SSH-S12** as seen in the picture below. This product is constructed with an EVA meltable adhesive inner tube, a polyolefin heat shrink outer tube, and two stainless steel strength members designed to "sandwich" the ribbon fiber minimizing undue stress on the fibers while providing maximum fiber uniformity and retentivity. This product utilizes the identical material formulations as that of our industry standard "Ribbon Fiber" series products. The entire assembly is designed to ensure that all members maintain perfect alignment during shipping, handling and shrinking. We are proud to say that all of our products are made here in the **USA** and most sleeves are in stock ready for immediate delivery.

FEATURES

- RoHS & REACH Compliant
- Outer tube meets SAE AMS-DTL-23053/18 Class 2
- Inner EVA meltable adhesive tube
- Full length strength members for total fiber support
- Close dimensional tolerances
- Open ended assembly minimizing possibility of air entrapment during heat shrinking
- Operating Temperature Range -55°C to +110°C
- Packaged in 25 per bag

PART NUMBER KEY

MFSS-SS24D	24mm Length
MFSS-SS30D	30mm Length
MFSS-SS40D	40mm Length
